EDUCATION

Bachelor of Science in Creative Technology and Design with Computer Science minor

University of Colorado Boulder || College of Engineering and Applied Science — Graduation: 05/2025

Major: Creative Technology and Design *Minor*: Computer Science

GPA: 3.81 *Major GPA*: 3.98

- *Awards*: **Magna Cum Laude,** CEAS Graduation Awards: **Community Impact Award** and the **Perseverance Award**, **Dean's List** (5 semesters), **Philanthropy Award** (Phi Sigma Rho)
- *Relevant Coursework*: Computer Systems, Mobile Application Development, HCI, Advanced Front-End Development

SKILLS

*Programming Languages***:** JavaScript, React Native, React.js, Node.js, HTML, CSS, TypeScript, Swift, Lua, Java, Python, C++, C#

*Software***:** GitHub, SwiftUI, SwiftData, XCode, VSCode, Figma, Unity, Canva, SketchUp, Excel, Adobe Photoshop, Adobe Illustrator

PROFESSIONAL EXPERIENCE

Actualize Earth, Boulder, CO

Full-Stack Developer Apprentice – Node.js, JavaScript, loveable.dev, Augment, Pickaxe, Figma, React.js — 10/2025 - Present

- Developed in-app feedback system increasing app reviews by **1500%**, collected 420 responses with 85% positive satisfaction.
- Designed and developed the "Synergy" connection-matching app, now commercially released within the Actualize platform, leveraging AI to develop **~6,000 lines** of production code with full testing in approximately **180 hours**.
- Peer-programmed on the backend of the Synergy app, contributing to API logic and system architecture.
- Integrated the matching engine with the client interface, enabling end-to-end feature functionality.
- Rapidly learned and applied a custom JavaScript framework using EJS templates and jQuery DOM manipulation.
- Helped expand the platform from mobile to web, migrating core features so the application could run on desktop browsers.
- Integrated and trained LLM-powered support chatbots, enabling users to access help resources directly inside the app.
- Conducted QA testing and debugging for v2 of the platform to ensure a stable production launch.
- Validated platform's Tap to Pay against Apple's compliance requirements reviewing and resolving required checks.

finish'd Inc., Boulder, CO

Front-End (UI/UX) Software Development Intern – Swift, Figma, Firebase, WCAG — 06/2025

- Conducted UI/UX research on design trends for older adults to understand challenges with current apps and platforms.
- Performed a UI/UX audit of the existing platform, outlining design changes to improve user functionality and accessibility.
- Built the app's current state in Figma to bridge design and development by interpreting code into visual representations.
- Applied design changes from the audit to Figma and developed them into the app's code using Swift.

Blueprint Boulder (Student-Run Nonprofit Organization), Boulder, CO

Team Lead of Front-End Development & VP of Nonprofit Relations – Node.js, Figma, Firebase, Sveltekit — 08/2023 – 05/2025

- Led front-end development for a student software team of 8 to build a database website for a nonprofit partner.
- Utilized Figma to design prototypes used by developers to implement project specifications.
- Conducted user testing and iteratively refined the UI**,** focusing on user-centered design principles to optimize client experience.
- Led 5-person cluster in proactively engaging with non-profit organizations to organize future projects with Blueprint.
- Managed communication between the nonprofit and the development team to meet customer needs.

University of Colorado Boulder, Boulder, CO

Teaching Assistant for Intro to Web - HTML, CSS, JavaScript — 08/2024 – 05/2025

- Led recitations, taught weekly assignment content, and addressed student questions to enhance learning outcomes.
- Supported approximately 70 students during office hours, answered questions and enhancing learning.
- Provided feedback and graded assessments to enhanced course delivery and student performance.

FEATURED PROJECT

Several featured projects are detailed at **ari-guzzi.com**

Social Matching Synergy MicroApp– JavaScript, Node.js, EJS Templating

- Designed and Developed an AI-assisted social matching platform for friendship, romance, and coworking connections.
- Peer-programmed backend contributing to API logic and integration between the matching engine and the client interface.
- Used custom JS framework with EJS and jQuery DOM manipulation for building hybrid mobile experiences.
